

FAA-2003-16722 Thgia is about the dummmest airspace change I have heard of. This will just about stop all VFR trafic from LAX to SanDiego. To go any distance off shore in a small aircraft is stupid, and to climb to 11,000 feet is impossible for may light aircraft. This suggestion is stupid!!! I would agree with all the otheer coments. I realy dont have much experince -- only a CFII with 8,500 hr +and 55yrs flying. For AOPA to call this a WIN WIN is stupid. Win for who the marines and for the Southern Ca group ,,no one in their flight school is getting hurt. This is a lose-lose for general aviation in southern Ca.
